DETAILED ACTION

Election/Restrictions

- Applicant's election with traverse of claims 1-6 in the response filed April 14.
 2004 is acknowledged. The traversal is on the ground(s) that there is no undue burden on the examiner to consider all of the claims. This is not found persuasive because:
- 2. Parker (US 2899110) teaches the food package as recited in claims 1-3, but does not require a push out device (i.e. a container in combination with a depression member) as recited in claims 9 and 10 or the method of claims 7 and 8 in order to dispense the contents. Mueller (US 62131904) teaches a container with a depressing member as required by the device of claims 9 and 10, but the depressing member is used as a ink stamp and not in combination with the recited food package of claims 1-6 or in the method of claims 7 and 8.
- 3. The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1-6 are rejected under 102(b) as being clearly anticipated by Watanabe (JP 07-227214 A).

Art Unit: 1761

- 6. See English Abstract in light of Figures1-4, Paragraphs 13-22, wherein the steps (i.e. angled segments) have annular bulges (i.e. at the arrow of "1") as shown in figures 1 and 2. Based on the figures 3 and 6 in view of Figures 2 and 5, the portion of the container which comprises the aperture (i.e. item 3 or 13) rests *inside* flanges 2 and 12. and thus flanges 2 and 12 serve as legs.
- 7. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tanaka et al. (US 5232027).
- 8. See Abstract, Figures 1 and 4, Column 3, lines 37-62.
- 9. Claims 1 and 4 are rejected under 102(b) as being anticipated by Connolly et al. (US 4452823).
- 10. Connolly et al. teach a push out flexible cylinder (via twist cap 46), an upper seal (with 48), a lower seal (item 44), a leg (item 36), and holding ice cream (Abstract, Figure 4, Column 7, lines 4-30).
- 11. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Parker (US 2889110).
- 12. Parker teaches a flexible truncated cone-shaped container (i.e. Item 10 of Figure5) for viscous foods having annular bulges (i.e. items 32) and steps

Art Unit: 1761

(i.e.30,29,28,27,26,25, etc.) wherein the bulges are uniform thickness (i.e. all are ribs 32), a "bottom" with a removable seal on the push-out aperture (i.e. the opening at 8a is formed at use), there is an "upper" seal (i.e. item 13), and material is pushed out of the container for dispensing (Column 1, lines 15-32, Column 2, line 39 to Column 3, line 20). Examiner notes that the terms "upper" and "bottom" are relative, based on the direction of dispensing (i.e. upwardly or downwardly).

- 13. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Frankenberg (US 3227308).
- 14. Frankenberg teaches a flexible outer cylinder (i.e. item 11) that has an upper seal ((i.e. item 31 in Figures 5 and 6), a removable bottom seal (i.e. item 39 shown in Figure 8), and annular bulges (i.e. shown in Figures 3 and 4) that are parallel to the bottom(Column 3, lines 10-20,35-41,60-67, Column line 29 to Column 5, line 7).
- 15. Claims 1-6 are rejected under 102(b) as being anticipated Scarnato (US 3939887).
- 16. Scarnato teaches a flexible cylinder for jellies with steps (item 6), bulges (item 8'), push out aperture (i.e. at base of neck 5) with a removable seal (item 13), a leg extending downward from the aperture(at 11a), a sealed upper opening (at 4).

Art Unit: 1761

Examiner notes that the terms "upper" and "bottom" are relative, based on the direction of dispensing (Column 5, lines 12-35, Embodiment of Figure 1, lines 9-56).

Conclusion

- 17. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Montgomery et al (US 5055336), McGill (US 5632415), and Nadelson (US 2092772) teach soft push out containers with viscous/semisolid foods.
- 18. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Madsen whose telephone number is (571) 272-1402. The examiner can normally be reached on 7:00AM-3:30PM M-F.
- 19. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on (571) 272-1398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
- 20. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
